MICROSOFT AZURE

Configure the storage settings

- Select the subscription.
- Select the previously created Resource Group.
- Enter a unique Storage Account name.
- Select the appropriate region/performance settings.
- Click Review + Create

Home > nandana_v > Marketplace > Storage account

Create a storage account

Select the subscription in which to create the new storage account. Choose a new or existing resource group to organize and manage your storage account together with other resources.

Subscription * Azure subscription 1

Resource group * nandana_v
[Create new](#)

Instance details

Storage account name * nandana9207

Region * (US) East US
[Deploy to an Azure Extended Zone](#)

Primary service * Azure Blob Storage or Azure Data Lake Storage

Performance *

☒ Standard: Recommended for most scenarios (general-purpose v2 account)

☐ Premium: Recommended for scenarios that require low latency.

Redundancy *

Locally redundant storage (LRS)

MICROSOFT AZURE

Step 4: Create Azure Data Factory

Step 5 : From Data Storage

- Open Containers

MICROSOFT AZURE

- Create the Source Container

The screenshot shows the Microsoft Azure portal interface. On the left, the navigation pane is open, showing the 'Containers' section under 'Data storage'. The main area displays the 'nandana9207' storage account. A 'New container' dialog box is open on the right. The 'Name' field is set to 'source'. The 'Anonymous access level' is set to 'Private (no anonymous access)'. The 'Create' button is highlighted with a red box.

Name	Last modified	Anonymous access level
source	8/18/2026, 8:53:16 PM	Private

- Create the Destination Container

The screenshot shows the Microsoft Azure portal interface. On the left, the navigation pane is open, showing the 'Containers' section under 'Data storage'. The main area displays the 'nandana9207' storage account. A 'New container' dialog box is open on the right. The 'Name' field is set to 'destination'. The 'Anonymous access level' is set to 'Private (no anonymous access)'. The 'Create' button is highlighted with a red box.

Name	Last modified	Anonymous access level
source	8/18/2026, 8:53:16 PM	Private
destination	8/18/2026, 9:00:31 PM	Private

MICROSOFT AZURE

- Choose Author
- Select New Pipeline

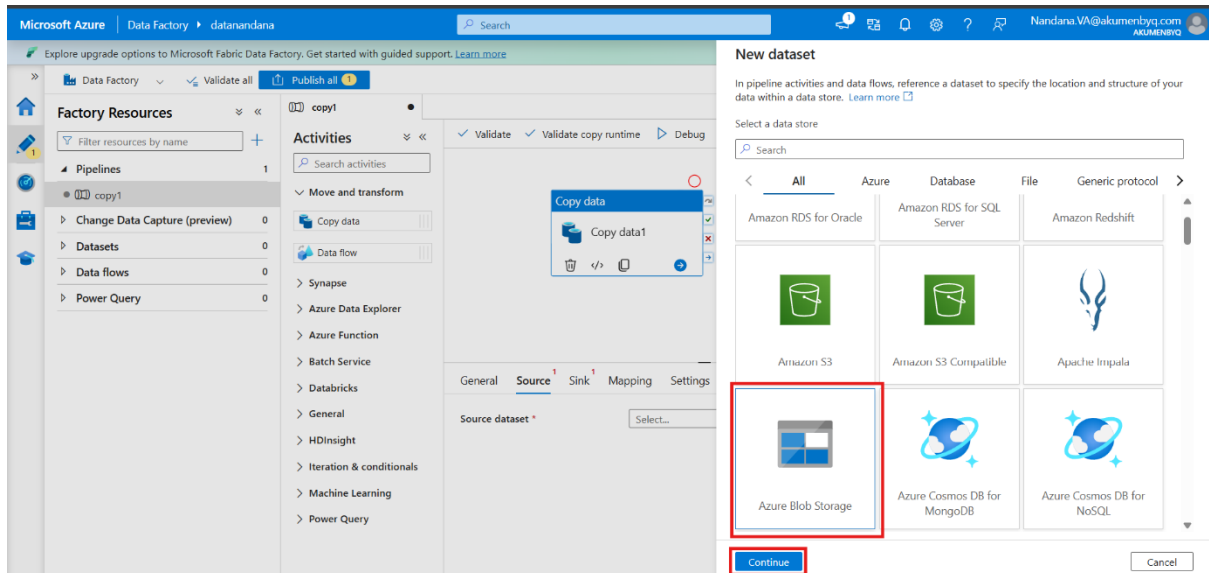

From the Activities , Drag and Drop Copy Data (From Move And Transform)

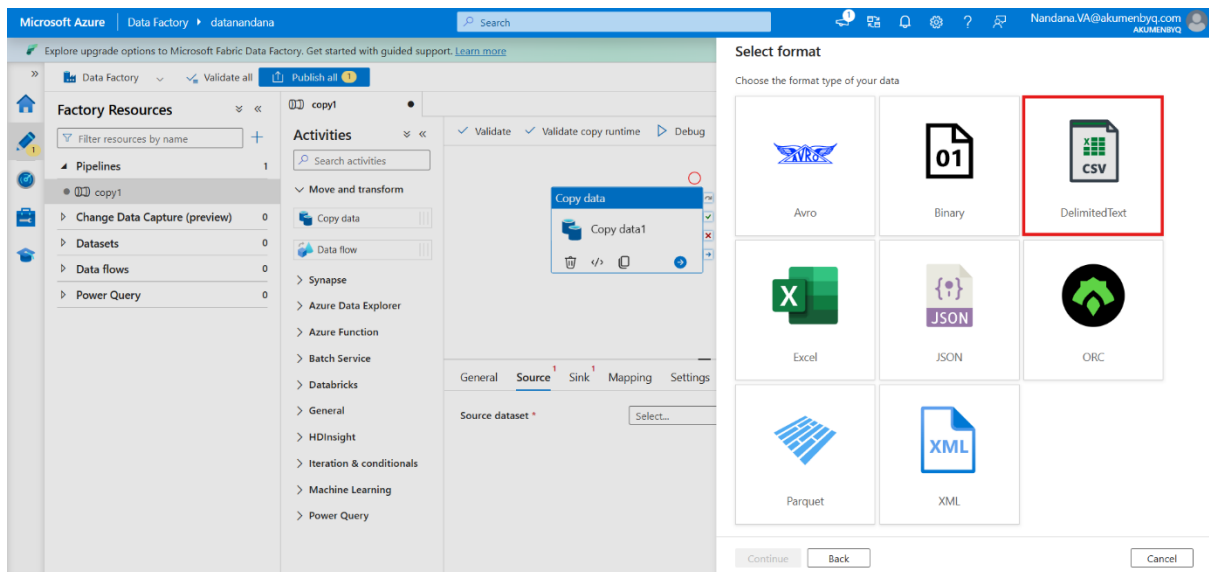

MICROSOFT AZURE

Create the Source Dataset

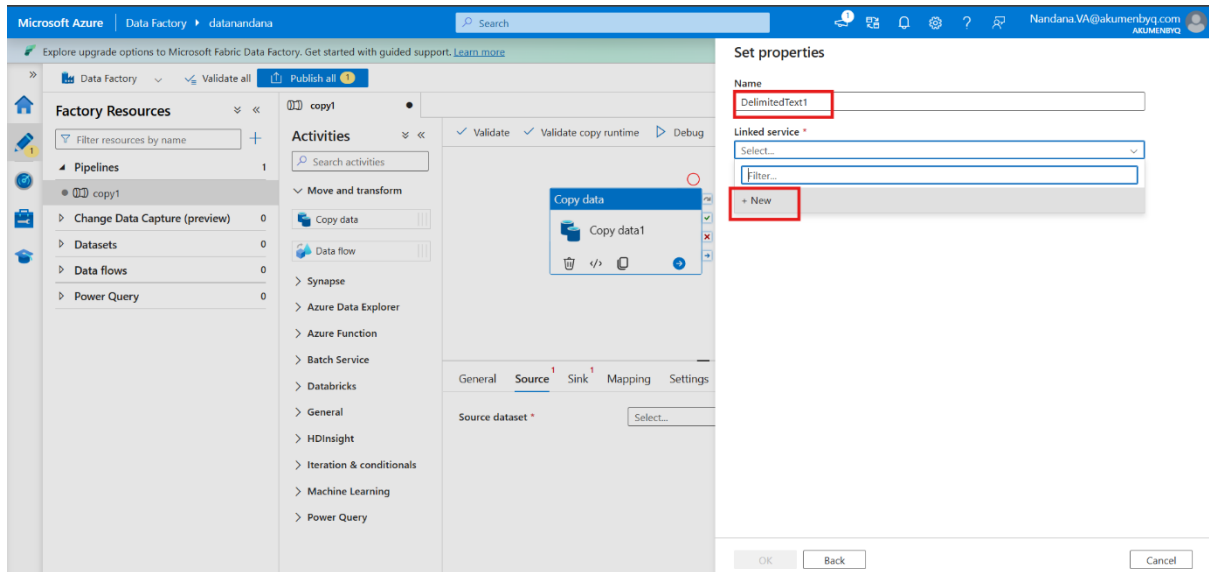

Choose Appropriate File Format

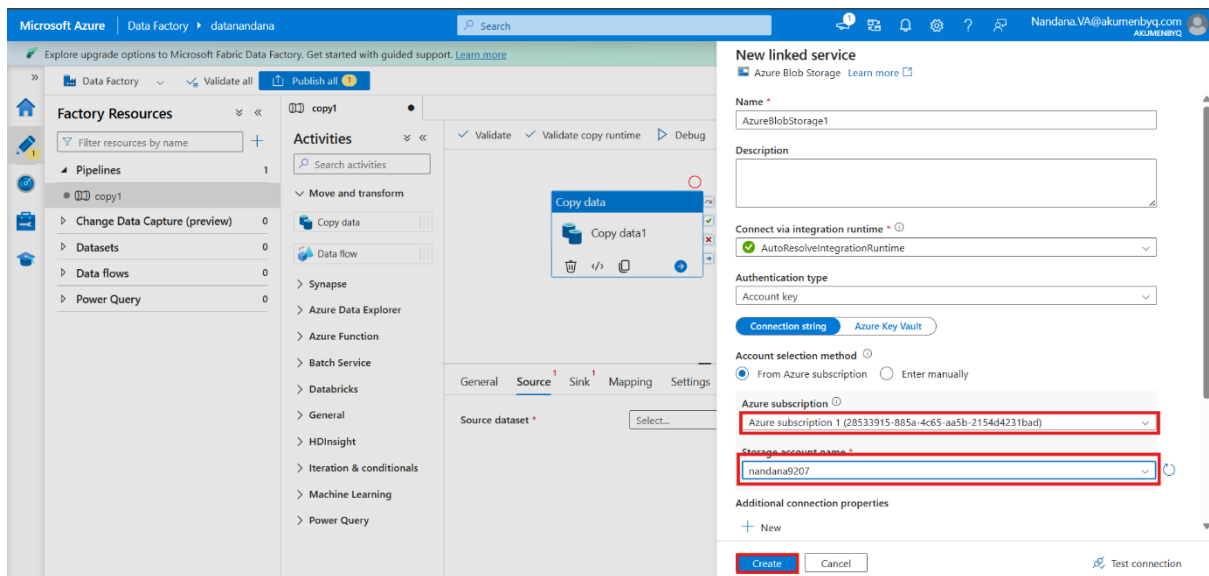

MICROSOFT AZURE

Set new link service

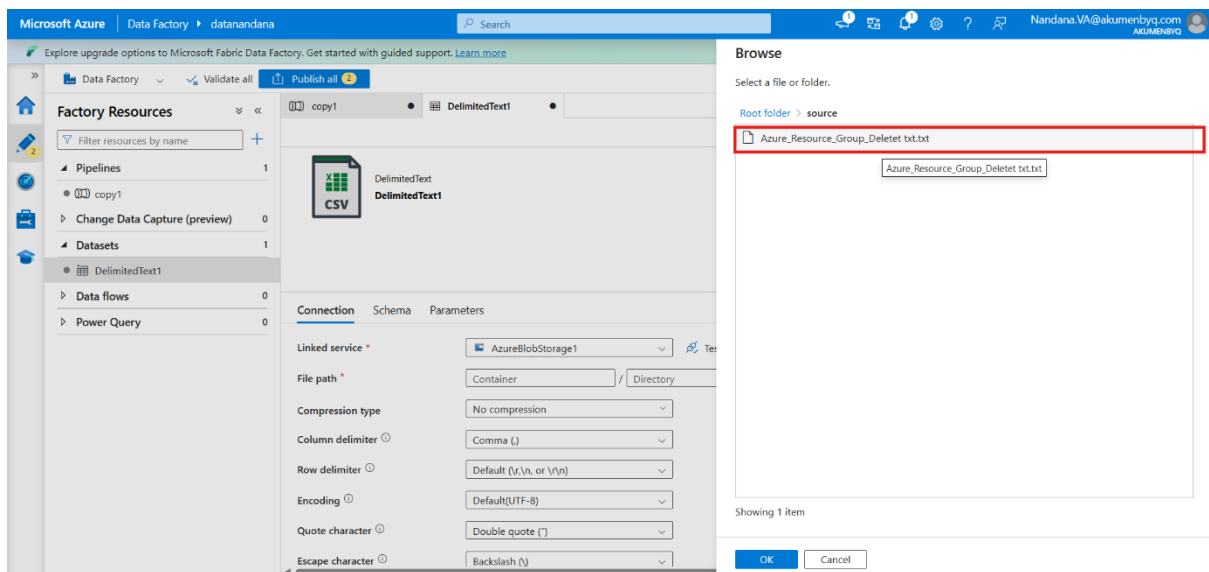

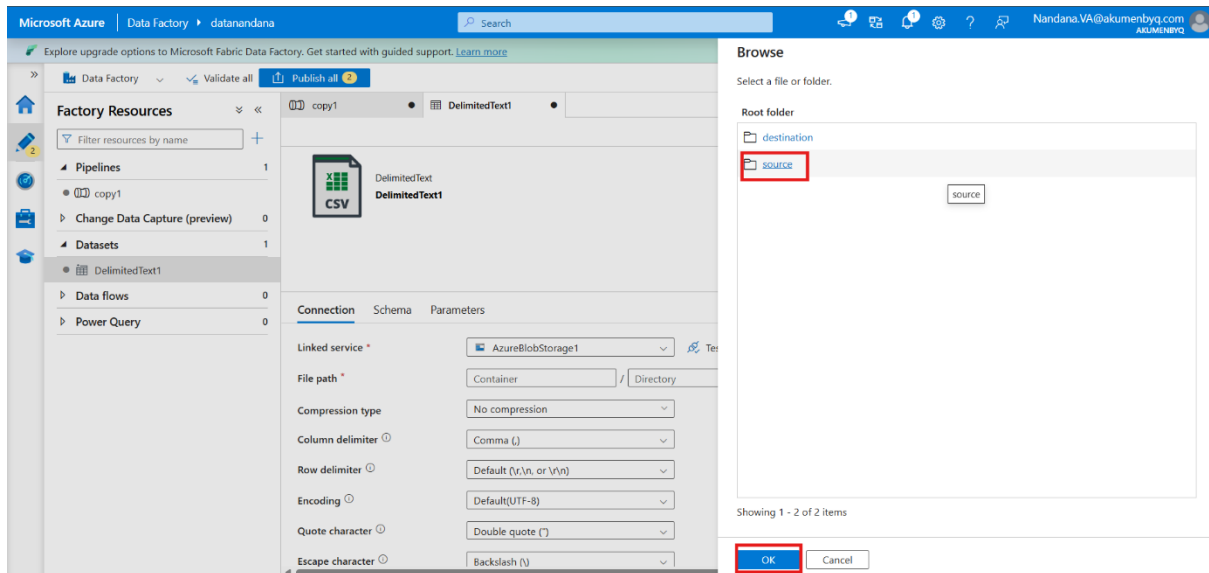

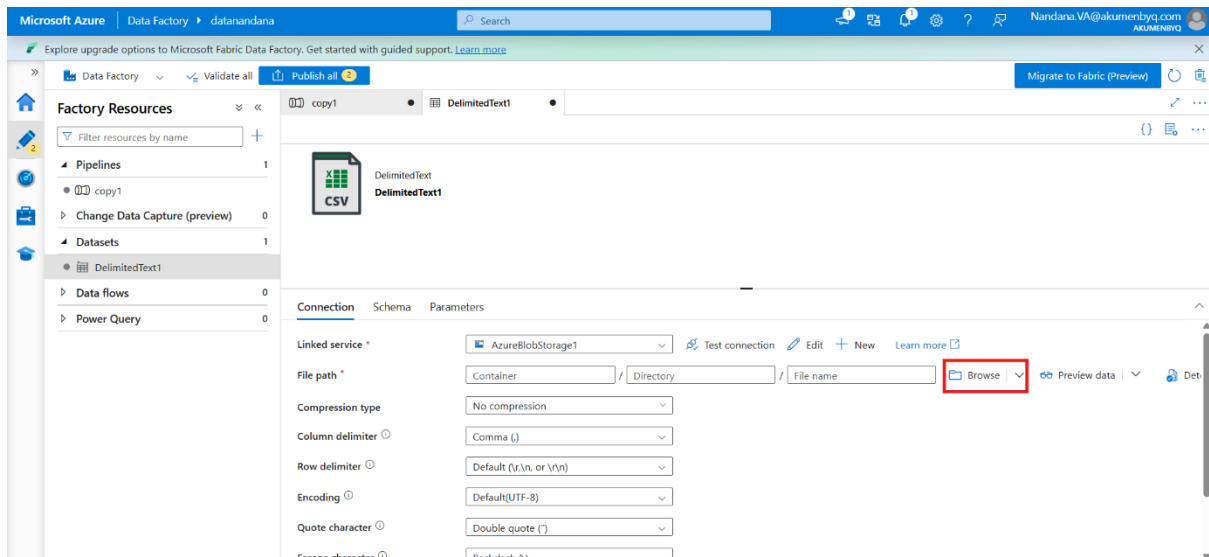

Configure the Linked Service

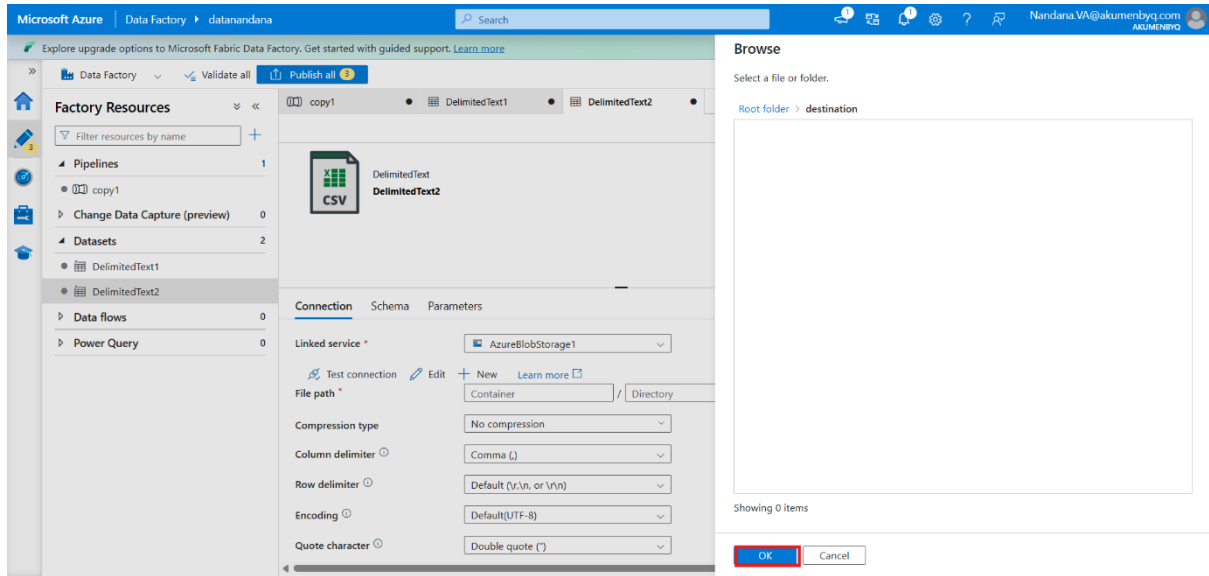

MICROSOFT AZURE

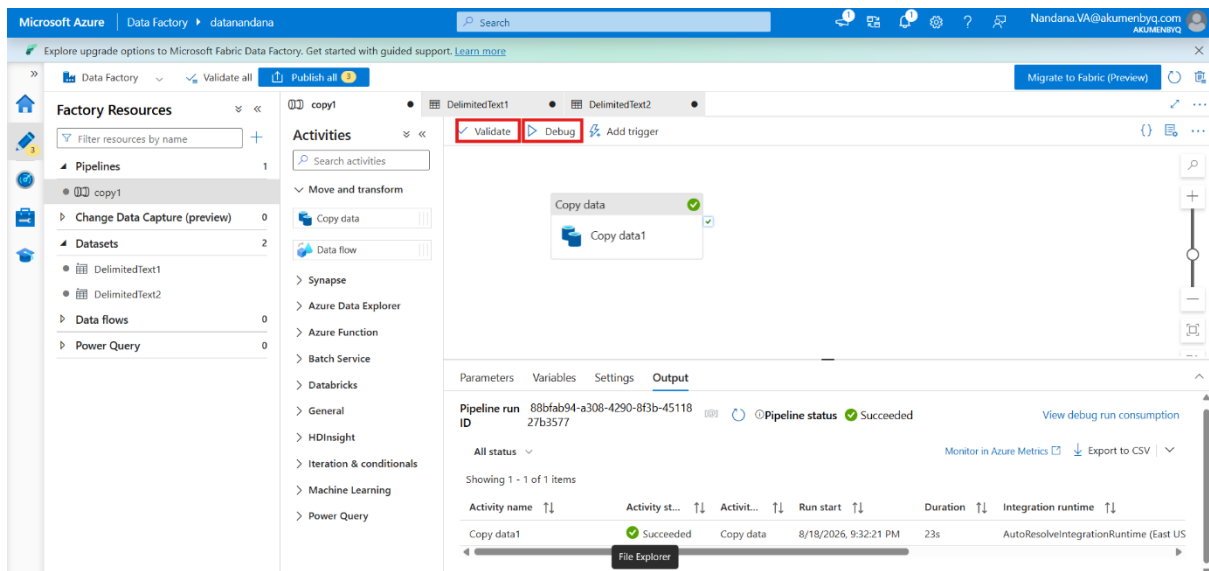

Browse and Select the Source File and Add the File Path in Source

MICROSOFT AZURE

Validate the Pipeline and Debug it

MICROSOFT AZURE

After the Pipeline Run ,the File which was inside the Source folder is Copied to the Destination Container

The screenshot shows the Microsoft Azure portal interface. The top navigation bar includes the Microsoft Azure logo, an 'Upgrade' button, a search bar, and a user profile. The breadcrumb trail indicates the path: Home > nandana_v > datanandana > nandana_v > nandana9207 > nandana_v > nandana9207 | Containers. The main content area is titled 'destination' and shows a list of blobs. The authentication method is 'Access key'. The search bar is empty. The table shows one item: 'Azure_Resource_Group_Deletet txt.txt'.

Name	Last modified	Access tier	Blob type	Size	Lease state
Azure_Resource_Group_Deletet txt.txt	8/18/2026, 9:32:39 PM	Hot (Inferred)	Block blob	290 B	Available

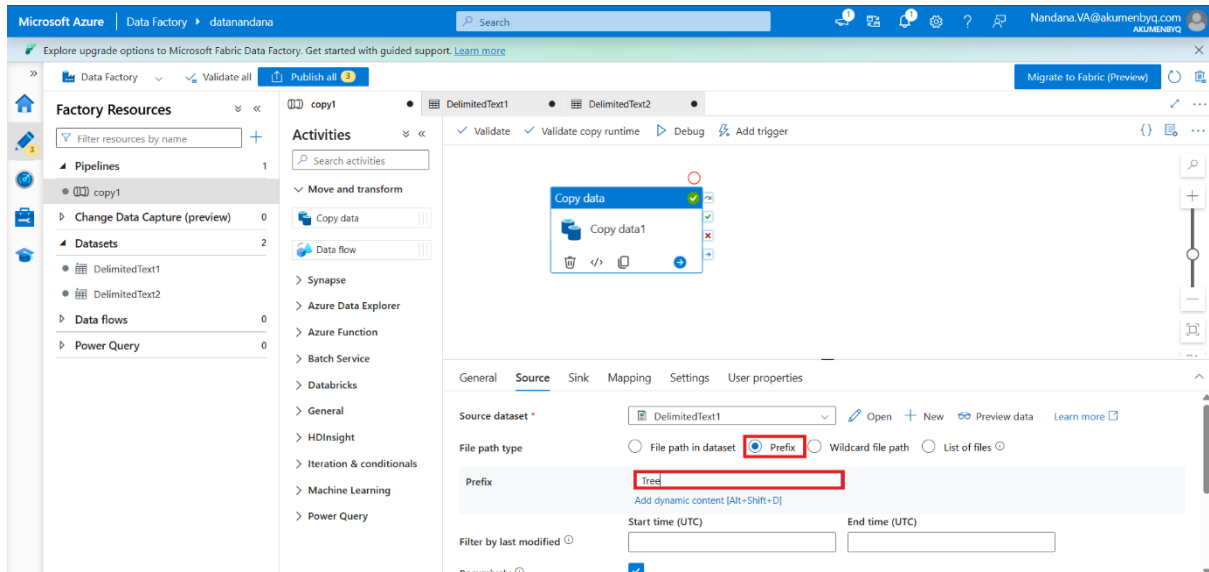

Upload more files to perform more copy data operations

The screenshot shows the Microsoft Azure portal interface. The top navigation bar is the same as the previous screenshot. The breadcrumb trail indicates the path: Home > nandana9207 | Containers. The main content area is titled 'source' and shows a list of blobs. The authentication method is 'Access key'. The search bar is empty. The table shows six items:

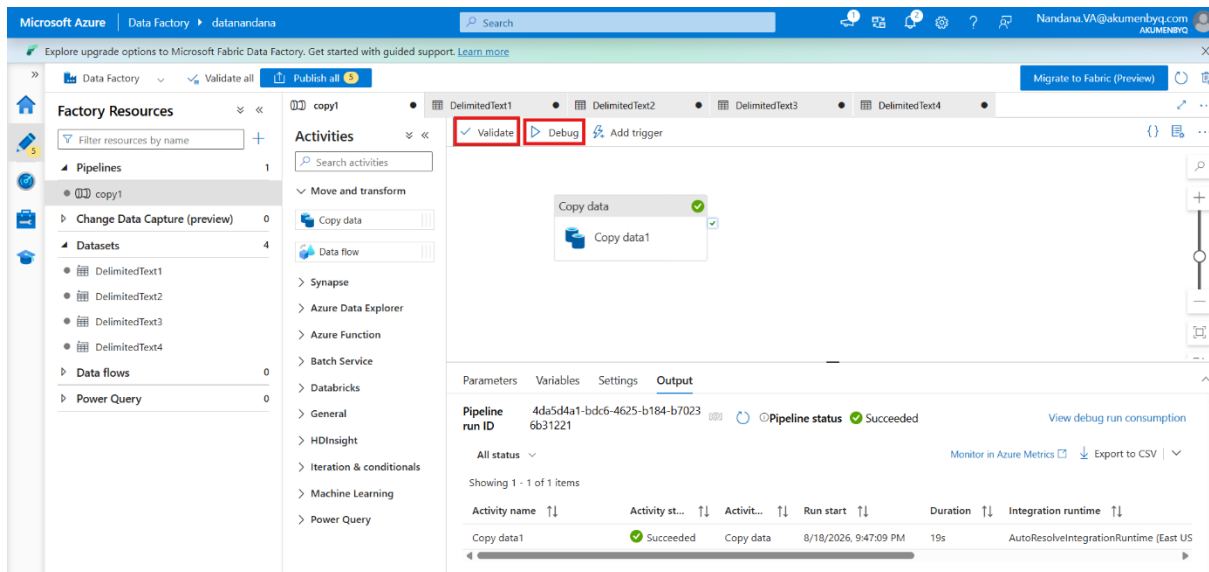

Name	Last modified	Access tier	Blob type	Size	Lease state
Azure_Resource_Group_Deletet txt.txt	8/18/2026, 9:40:03 PM	Hot (Inferred)	Block blob	290 B	Available
Projectkp - Copy (3).ipynb	8/18/2026, 9:40:06 PM	Hot (Inferred)	Block blob	4.3 MiB	Available
Projectkp.ipynb	8/18/2026, 9:40:06 PM	Hot (Inferred)	Block blob	4.3 MiB	Available
Tree1.txt	8/18/2026, 9:40:03 PM	Hot (Inferred)	Block blob	7 B	Available
Tree2.txt	8/18/2026, 9:40:03 PM	Hot (Inferred)	Block blob	7 B	Available
Tree3.txt	8/18/2026, 9:40:04 PM	Hot (Inferred)	Block blob	7 B	Available

MICROSOFT AZURE

Step 8: Next Copying Data using Prefix (we gave the prefix as “cit” to get the files starting with cit)

- Follow the previous steps selecting the source and destination path
- Validate and Debug

MICROSOFT AZURE

All the file name which start with cit are copied to destination

The screenshot shows the Microsoft Azure portal interface. At the top, there's a navigation bar with 'Microsoft Azure' and an 'Upgrade' button. Below it, the breadcrumb path is 'Home > nandana9207 | Containers'. The main heading is 'destination' with a sub-heading 'Container'. On the left, there's a sidebar with 'Overview', 'Diagnose and solve problems', 'Access Control (IAM)', and 'Settings'. The main area shows a search bar and a table of blobs. The table has columns: Name, Last modified, Access tier, Blob type, Size, and Lease state. There are three rows of blobs, all named 'Tree1.txt', 'Tree2.txt', and 'Tree3.txt', all with a size of 7 B and a lease state of 'Available'. The authentication method is 'Access key' and the search filter is 'Search blobs by prefix (case-sensitive)'.

Name	Last modified	Access tier	Blob type	Size	Lease state
Tree1.txt	8/18/2026, 9:47:24 PM	Hot (Inferred)	Block blob	7 B	Available
Tree2.txt	8/18/2026, 9:47:24 PM	Hot (Inferred)	Block blob	7 B	Available
Tree3.txt	8/18/2026, 9:47:24 PM	Hot (Inferred)	Block blob	7 B	Available

Step 9: Wildcard file path

- Copy the data by giving the file type (Eg. .pdf,.txt,.csv etc)
- Here we're going to fetch a .txt file

The screenshot shows the Microsoft Azure Data Factory interface. The left sidebar shows 'Factory Resources' with 'Pipelines' and 'Datasets'. The main area shows the 'copy1' pipeline with a 'Copy data' activity. The 'Copy data' activity is selected, and its configuration is shown in the 'Source' tab. The 'Source dataset' is 'DelimitedText3'. The 'File path type' is 'Wildcard file path'. The 'Wildcard paths' are 'source / Wildcard folder path / *.txt'. The 'Filter by last modified' and 'Recursively' options are also visible.

Source dataset: DelimitedText3

File path type: ☒ Wildcard file path

Wildcard paths: source / Wildcard folder path / *.txt

Filter by last modified: Start time (UTC) End time (UTC)

Recursively: ☒

MICROSOFT AZURE

Validate and Debug the Pipeline

The screenshot displays the Microsoft Azure Data Factory console. On the left, the 'Factory Resources' pane shows a list of pipelines, with 'copy1' selected. The main area shows the 'Activities' tab for 'copy1', where a 'Copy data' activity is highlighted. Below this, the 'Pipeline run' section shows the status of the pipeline run 'c5dbb7f1-8b14-49a1-9fab-f11330c15967' as 'In progress'. The 'Output' tab is active, showing a table of activity results.

Activity name	Activity st...	Activit...	Run start	Duration	Integration runtime
Copy data1	Succeeded	Copy data	8/18/2026, 9:54:05 PM	20s	AutoResolveIntegrationRuntime (East US

The file with the extension .txt has been copied to the destination

The screenshot shows the Microsoft Azure Storage Explorer interface. The left pane shows the 'destination' container. The main area displays a table of files in the container, with a red box highlighting the first four rows.

Name	Last modified	Access tier	Blob type	Size	Lease state
Azure_Resource_Group_Deletet txt.txt	8/18/2026, 9:54:21 PM	Hot (Inferred)	Block blob	290 B	Available
Tree1.txt	8/18/2026, 9:54:21 PM	Hot (Inferred)	Block blob	7 B	Available
Tree2.txt	8/18/2026, 9:54:21 PM	Hot (Inferred)	Block blob	7 B	Available
Tree3.txt	8/18/2026, 9:54:21 PM	Hot (Inferred)	Block blob	7 B	Available

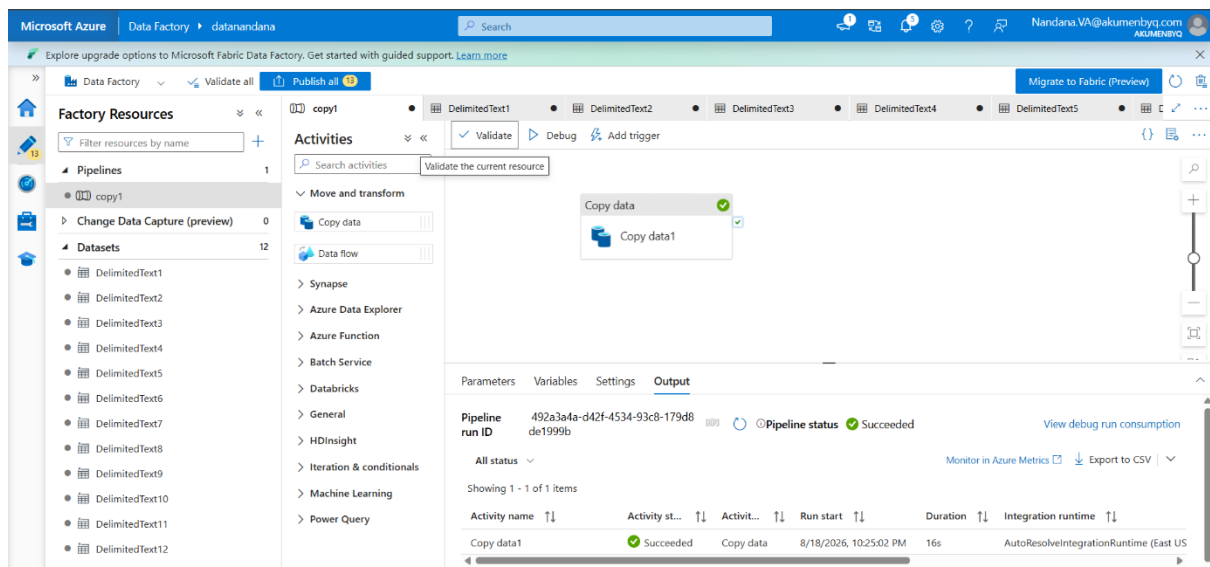

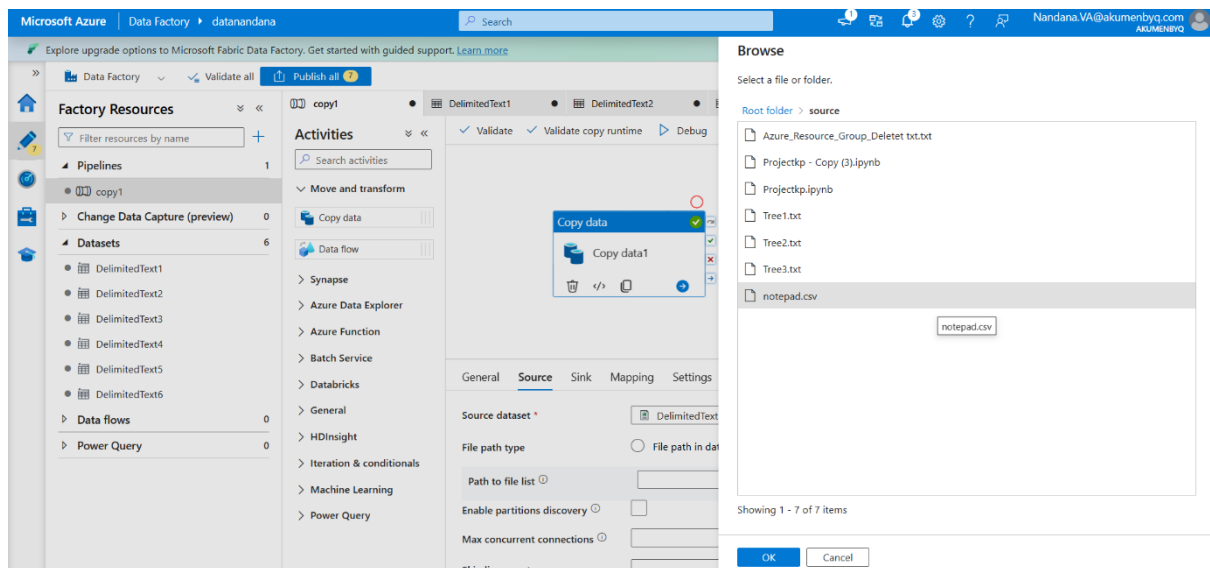

Add or remove favorites by pressing Ctrl+Shift+F
